

On Demand (Network as a Service)

Features and Benefits

✔ Easy Button

Get connectivity in minutes, not months. Our award-winning portal and APIs support Ethernet, cloud and Internet (DIA) connectivity to millions of locations globally, enabling new services to be requested in minutes.

✔ Global Reach

Instantly request services to 32,000+ enterprise office locations already connected to the Colt fibre network. Reach millions of offnet locations by selecting the integrated carrier partner of your choice.

✔ Smart Path

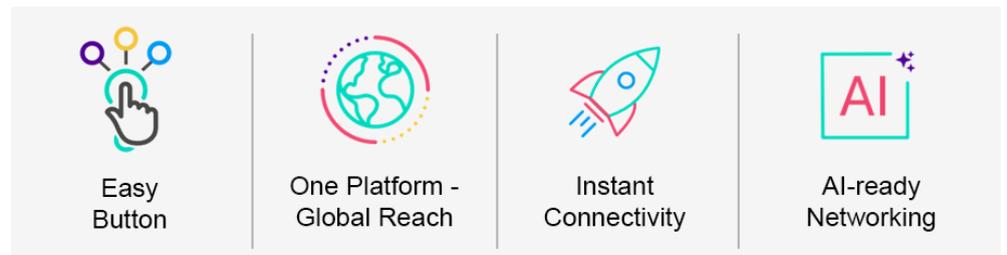

Choose your own network route: keep traffic within defined countries or regions to meet sovereignty objectives, avoid certain cities or submarine cables, maintain path diversity and compare carbon emissions for each available path to meet sustainability goals.

✔ Greater Resilience

Instantly request access layer diversity to support more resilient NaaS enabled Ethernet, Cloud, and Internet services.

Achieve real-time and scalable control of your network connectivity

Colt On Demand: Gain time to focus on what matters

In a world where every minute matters, imagine a new approach to digital infrastructure. One that gives you time to focus on what matters most, along with the control, reach, security and flexibility your business needs.

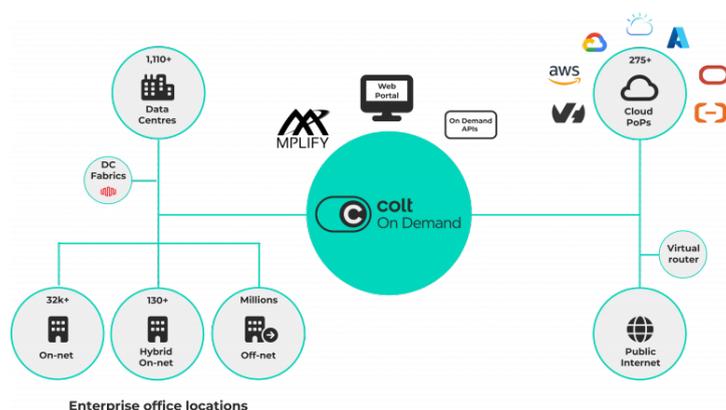

Colt On Demand leads this transformation, helping enterprises build AI-ready infrastructure with flexible, automated, and scalable connectivity. By enabling real-time provisioning, dynamic bandwidth control, and API-driven integration, Colt On Demand ensures networks are prepared to support the agility and performance required for AI-driven applications.

Achieve real-time and scalable control of your network connectivity

Colt On Demand, our Network as a Service (NaaS) platform is built on advanced SDN (Software Defined Networking) and NFV (Network Function Virtualization) technologies, Colt On Demand delivers agility, scalability, and cost efficiency – empowering organizations to thrive in an AI-driven world.

Our On Demand platform transforms the user experience by delivering self-service capabilities for real-time ordering, provisioning and real time bandwidth flexing – requesting a new service is just a few clicks away. We can deliver new On Demand access ports to over 1,100 data centres, 32,000 on-net enterprise locations and millions of enterprise office buildings across 180+ countries serve via our carrier partners.

Colt On Demand is the “easy button” for your business, enabling new services to be requested in minutes, globally, and changes to be made to live services in near real time.

✔ Cloud Connectivity

Private, direct access to a wide range of hyperscalers and sovereign and neocloud partners via 275+ on-ramps globally, ensuring secure, scalable, high-performance connectivity with simplified provisioning.

✔ Flexible Contract Options

Choice of fixed long-term contracts or flexible short-term pay-as-you-go billing with real-time bandwidth adjustments and minimum 1-hour commitment.

✔ API Integration

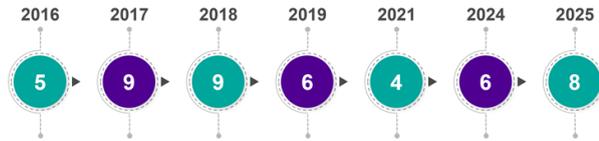

Customers can integrate On Demand directly into their own OSS platform by integrating via API. Choose between the industry standard Mplify Sonata API and Colt's own "SDN" API – both offer real time pricing, ordering, and in-life changes.

Our service gives you dedicated, high-performance and scalable Ethernet and Internet between any of your sites – data centres, enterprise buildings or access points into public cloud providers such as Amazon Web Services, Microsoft Azure, Google Cloud Platform, IBM Cloud, Oracle Cloud, OVHcloud and Alibaba Cloud. As a result, all your IT services, business-critical or not, can work together seamlessly and be up running in minutes.

Recognized for Excellence

Colt On Demand has earned industry recognition for its innovation, performance, and customer impact. These awards highlight our commitment to delivering agile, high-quality connectivity and leading the way in on-demand networking.

40+ Global Industry Awards since 2016
